ABOUT ME

As a versatile Software Developer, I possess a robust expertise in Back-End Web Development, AI & Machine Learning, DevOps, and Object-Oriented Programming (OOP), complemented by proficiency in MEAN stack development. My skill set is geared towards designing and implementing secure, scalable, and high-performing applications. I excel in collaborating with stakeholders to align with business requirements and am deeply passionate about problem-solving, writing clean code, and adopting emerging technologies to deliver impactful software solutions. I am eager to join Microlto, where I can contribute to pioneering software development projects, assist in software implementation, and enhance my expertise through continuous learning and certifications.

SKILLS

- FLUTTER
- REACT NATIVE
- KOTLIN
- SWIFT
- JAVA
- ANDROID SDK
- ANGULAR
- API INTEGRATION
- FIREBASE
- CI/CD
- DOCKER
- ENCRYPTION
- EXPRESS.JS
- FRONT-END
- GITHUB
- HRMS
- JAVASCRIPT
- TYPESCRIPT
- NODE.JS
- MONGODB
- MYSQL
- POSTGRESQL
- OBJECT-ORIENTED PROGRAMMING (OOP)
- KUBERNETES
- AI AND ACHINE LEARNING ENGINEER

WORK EXPERIENCE

PAHAPPA LIMITED
Ntinda,Kampala
Jun 2025 - Present

Devops Intern

- Developed enterprise applications using Spring Boot, effectively integrating the Spring ecosystem including Spring MVC, Spring Data JPA, Spring Security, and Spring Cloud.
- Implemented Hibernate ORM, leveraging JPA for database interactions and enhancing performance through caching optimizations.
- Integrated multiple database platforms such as MySQL, PostgreSQL, Oracle, and MongoDB, ensuring seamless data management across systems.
- Designed and developed both Microservices and Monolithic architecture patterns to meet varying project requirements.
- Constructed RESTful APIs and contributed to event-driven architecture development, facilitating efficient system integration and communication.

MAKERERE UNIVERSITY
Kampala
Jan 2022 - Dec 2023

Student Software Engineer

- Developed TaskApp using Kotlin, a task management mobile application featuring real-time synchronization to enhance user productivity.
- Engineered scalable applications using React Native and Flutter for both academic and freelance projects, demonstrating versatility in cross-platform development.
- Implemented secure authentication workflows, contributing to robust app security and user trust.
- Optimized mobile app performance, ensuring a seamless user experience and reducing lag.
- Spearheaded the development of a fintech mobile app, focusing on digital payments, user rewards, and transaction tracking to meet the growing demand for mobile financial services.
- Integrated third-party payment APIs, facilitating reliable and secure payment processing.
- Designed a scalable app architecture capable of handling high transaction volumes, preparing the app for future growth and user base expansion.

WEB INFO-NET LIMITED
Kampala
Jun 2018 - Aug 2022

Application Developer Intern and Trainer

- Maintained proficiency in the latest mobile development technologies to enhance application efficiency.
- Designed and executed mobile applications utilizing Swift, Java, and Kotlin programming languages.
- Implemented robust authentication protocols and established API connections for secure user access.
- Delivered prompt Level 1 technical support for mobile application deployment issues.
- Contributed to troubleshooting efforts, effectively debugging and refining performance of Android and iOS applications.

ZALONIDENTALHUB
Kampala
Apr 2022 - Present

Leading Developer and Maintainer

- Spearheaded the full software development lifecycle of advanced dental practice solutions, from initial design to successful deployment.
- Engineered robust desktop systems using C#/VB.NET for efficient inventory and patient management, optimizing clinic workflows.
- Led the development of a Flutter-based mobile application, integrating e-commerce and appointment scheduling features to enhance patient engagement.
- Ensured seamless desktop-mobile interoperability, facilitating a cohesive user experience and improving clinic operations.
- Directed a team in creating comprehensive software architectures, establishing a solid foundation for scalable and maintainable systems.

EDUCATION

MAKERERE UNIVERSITY
Kampala
2027

Bachelor of Science in Software Engineering

- Have Achieved a CGPA of 4.29 in B.Sc. in Software Engineering, specializing in Artificial Intelligence and Machine Learning.
- Integrated Supabase, MongoDB, and Firebase for robust storage solutions across web and mobile platforms.
- Implemented role-based access control and data encryption to bolster application security.
- Developed a Human Resource Management System mobile app to enhance employee workflow management.
- Gained hands-on experience with IoT and Embedded Systems.
- Integrated secure authentication and access control mechanisms.
- Optimized database interactions and performance using advanced PostgreSQL techniques.

MAKERERE UNIVERSITY
Kampala

Bachelor of Science in Computer Engineering

- Transitioned from Computer Engineering to Software Engineering.
- Equipped with Digital Electronics knowledge and expertise.
- Proficient in Hardware Repair and Maintenance.

UGANDA TECHNICAL COLLEGE -LIRA
Lira
2018

National Diploma in Information Communication Technology

- Achieved a CGPA of 4.77 in B.Sc. National Diploma in Information and Communication Technology.
- Specialized in Database Management and Web Development.
- Acquired proficiency in Internet-based technologies with practical skills.
- Implemented Role-Based Access Control (RBAC) and Data Encryption for enhanced application security.
- Gained expertise in Java technologies and application development.
- Developed knowledge in Computer Networking and Server Configuration.

BOSTON HIGH SCHOOL-MPALA
Kampala
2015

High School Education

- Graduated top 5% of class
- Varsity Debate Team Captain
